Spell Casting Table

Char Level	Cast Range (INT) (Spaces)	Tether Range (AGI) (Spaces)	Spell Duration (CHA) (min)	Area Radius (MIG) (Spaces)
1	x1	x2	x1	x1
2	x2	x4	x5	x2
3	x4	x12	x15	x3
4	x7	x28	x30	x4
5	x11	x55	x50	x5
6	x16	x96	x75	x6
7	x23	x161	x110	x7

8	x30	x240	x150	x8
9	x45	x385	x200	x9
10	x70	x700	x300	x10

Reality Bender

You are a spellcaster whose only limitation is your own imagination.

Starting Equipment

This class grants you no additional starting equipment.

Reality Bender Spellcasting Path

2025-05-28: copied from DC20 Core Rules Beta 0.9.5

Combat Training: None

Spell List: You choose 1 school of magic. This is your Bonded School. When you learn a new Spell, you can choose any Spell from your Bonded School.

Cantrips Known: The number of Cantrips you know increases as shown in the Cantrips Known column of the Reality Bender Class Table. Cantrips are Spells with the Cantrip Spell Tag.

Spells Known: The number of Spells you know increases as shown in the Spells Known column of the Reality Bender Class Table. These can be Spells with or without the Cantrip Spell Tag.

Mana Points: Your maximum number of Mana Points increases as shown in the Mana Points column of the Reality Bender Class Table.

Spellcasting Focus: You choose a body part and a color. When you cast spells, this body part glows, shedding dim light of that color in a 1 Space radius.

Cast Range: If a spell you cast in your bonded schools has a base range greater than Touch or Self, its base range is changed to your Cast Range. Your Cast Range is determined by your INT multiplied by your level's Cast Range multiplier. The value is in Spaces, minimum a number of Spaces equal to your level.

EX: If your INT is 3 and you're level 2, your Cast Range is 6 Spaces

Tether Range: You can only sustain a spell in your bonded schools if at least one part of it is inside your Tether Range. It must also be on the same plane as you. Your Tether Range is determined by your AGI multiplied by your level's Tether Range multiplier. The value is in Spaces, minimum a number of Spaces equal to your level times 2. Spell enhancements that increase cast range also increase tether range by the enhancement's value times 2.

Ex: If your AGI is 2 and you're level 3, your Tether Range is 24 Spaces.

Spell Duration: If a spell you cast in your bonded schools has a duration longer than instant or 1 round, its duration is changed to your Spell Duration. Your Spell Duration is determined by your CHA multiplied by your level's Spell Duration multiplier. The value is in minutes, minimum a number of minutes equal to your level divided by 5 (1 min is 5 rounds).

EX: If your CHA is 4 and you're level 5, your Spell Duration is 200min, which is equivalent to 3hr 20min.

Area Radius: If a spell you cast in your bonded schools has an area of effect, its radius is equal to or less than your Area Radius. Your Area Radius is determined by your MIG multiplied by your level's Area Radius multiplier. The value is in Spaces, minimum a number of Spaces equal to your level.

EX: If your MIG is 2 and you're level 7, your Area Radius is 14 Spaces.

Sustain: Your spells all require Sustaining, even if they don't explicitly state it. You may cast spells while already Sustaining spells, even outside of combat. You may spend 1 AP on each of your turns to Sustain a number of spells up to your CM. You can't sustain a spell that is outside your Tether Range or on a different plane.

Volatility: Your spell effects are temporary, even if the spell explicitly states that it is permanent. Objects and creatures that you create are also temporary. Your spell effects automatically disappear/revert when you stop Sustaining them or their duration expires.

Reality Bender Class Features

Level 1 Class Features

Bending Trick

You know a spell so well you can cast it with ease. Choose a spell you know. Increase its Bending Trick level by 1, leveling it up. It then counts as a Bending Trick for you.

When you cast a Bending Trick, you:

- Increase your Mana Spend Limit by the spell's Bending Trick level for this spell cast.
- Decrease its MP cost by its Bending Trick level, minimum 0. This cost reduction still counts against your Mana Spend Limit.

When you level up, you can increase the Bending Trick level of one of your spells by 1, as shown in the class table.

Dangerous Casting

You may dangerously cast a spell, spending over your Mana Spend Limit. Make a Spell Check with a DC equal to 10 plus 3 times the difference between your Mana Spend Limit and the MP spent:

Success: You cast the spell.

Failure: You don't cast the spell, but the MP are still spent, and you cannot cast that spell again until you finish a long rest.

Dangerously Cast DC = 10 + ((Mana Spend Limit – MP spent) * 3)

You may spend AP to gain ADV on this roll like normal.

Reality Observer (Flavor Feature)

Your spells are only limited by your imagination. You gain the following reaction:

Reality Observer

Trigger: You see another creature cast a spell in your bonded schools

Reaction: You attempt to learn the spell. Make a Spell Check, with a DC equal to 10 plus the spell's MP cost minus your Mana Spend Limit:

Success: You learn the spell, but you must finish a long rest before you are able to first cast it.

Success (10): You learn the spell.

Failure: You don't learn the spell, but you gain ADV on your next check to learn it.

Reality Observer DC = 10 + spell's MP cost – Mana Spend Limit

Level 2 Class Features

Bond Affinity

You gain affinity for spells in your bonded schools, manipulating them to your will. You gain 2 Bond Affinity options from the list below. You learn more as you level up, as shown in the class table. You can apply as many Bond Affinity options to a spell as you want, but only as long as the resulting total doesn't go over your Mana Spend Limit. You can only apply Bond Affinity options to spells in your bonded schools. MP spent on Bond Affinity options count against your Mana Spend Limit.

- **Powerful:** 1 MP. Increase healing, damage, or temporary hp of the spell by 1.
- **Reuse:** 1 MP. The next time you cast this spell, it costs 2 MP less to cast, minimum 0.
- **Quick:** 2 MP. Ignore the Multiple Check Penalty for Spell Checks for this spell cast.
- **Reactive:** 2 MP. Cast this spell as a reaction, even if you didn't declare a hold action.
Trigger: Anything.
Reaction: Cast this spell.
- **Hasty:** 2 MP. Spend 1 AP to cast this spell, if the spell's cast time is 1 minute.
- **Capital:** 1 MP. Increase your Mana Spend Limit by 3 for this spell cast.
- **Animating:** 1 MP. Cast this spell without requiring it to be sustained.
- **Focused:** 1 MP. Add your prime modifier to the prime modifier used by this spell cast.
- **Reaching:** 1 MP. Increase this spell's cast range by your Cast Range.
- **Remote:** 1 MP. Increase this spell's tether range by your Tether Range.
- **Lasting:** 1 MP. Increase this spell's spell duration by your Spell Duration.
- **Wide:** 1 MP. Increase this spell's area radius by your Area Radius, if it has an area of effect.

- **Lingering:** 0 MP. When you stop sustaining this spell, it lingers for 1 minute before it disappears.

Reality Studier (Flavor Feature)

You can more easily absorb information about spells that you see.

You may spend 1 minute studying an ongoing spell effect to make a Spell Check. The DC is equal to 20 plus the spell's MP cost minus your Mana Spend Limit. Success: you figure out how to cast the spell and can cast the new spell after a long rest. Failure: you don't figure out the spell, but may try to study it again immediately.

Reality Studier DC = 20 + spell's MP cost – Mana Spend Limit

Level 5 Class Features

Spell Warp

You can change ongoing spells. You gain the following reaction:

Spell Warp

Trigger: One of your spells ends.

Reaction: You may cast a spell on the same target(s) without spending AP or MP.

The new spell may be the same spell or a different spell. The new spell must target the same target(s) or area as the old spell, and the MP cost of the new spell must be equal to or less than the MP cost of the old spell.

Class Capstone Feature

Reality Command

You gain command of your spells more easily. You may choose a new Bending Trick spell at the start of every month, not just when you level up.

Class Talents

Expanded Bonded School

Choose 1 additional Spell School that also counts as your bonded school. You can't choose the same School more than once.

Arcane Growth

Your Attribute Limit is now 1 higher than the Attribute Limit for your level.

Quick Casting

Requires Level 3

You can easily cast quick spells. Whenever you cast a spell in your bonded school, if the total AP cost of that spell is 1, you can ignore the Multiple Check Penalty for that spell cast.

Bond Affinity Ease

Requires Bond Affinity, Level 3.

You can more easily apply Bond Affinity options. You may spend 1 AP to reduce the cost of a Bond Affinity option by 1 MP. You may do this multiple times per spell. This AP cost still counts against your Mana Spend Limit.

Bond Affinity Experimenter

Requires Bond Affinity, Level 3.

Whenever you finish a long rest or level up, you may switch out a Bond Affinity option you know with another Bond Affinity option you don't know. Both Bond Affinity options must be from the Bond Affinity list.

When you level up, you may choose to learn 2 additional Bond Affinity options from the Bond Affinity list, permanently. If you do, you lose this feature.

Subclasses

Reality Breaker

You bend reality so much that things stop making sense.

Level 3 Subclass Features

Chaos

Buildup: Whenever you finish a long rest, you gain Chaos Points equal to your CM. While you have Chaos Points, you are innately Chaotic.

Release: You may spend Chaos Points to pay for a spell's MP cost. This makes the spell Chaotic.

Spread: Spells cast by a Chaotic creature also become Chaotic. Targets and area effected by a Chaotic spell also become Chaotic.

Feedback: Whenever a Chaotic creature spends MP to cast a spell from your Bonded School, you gain 1 Chaos Point.

Burn: At the start of your turn, make a Spell Check against the AD of all Chaotic creatures. **Hit:** The target takes true damage equal to your Chaos Points minus your Mana Spend Limit.

Revert: When you are no longer Sustaining any Chaotic spells, all other creatures and spells that you made Chaotic are no longer Chaotic.

Chaotic Aura (Flavor Feature)

Things always seem to go wrong around you. Creatures within your Cast Range that you are looking at gain DisADV on all Saves.

Level 6 Subclass Features

Chaotic Trigger

You can let out your chaotic urges on a dime. You gain the following reaction:

Chaos Trigger

Trigger: You gain Chaos Points.

Reaction: You cast a Bonded School spell you know.

Chaos Modifier

Your chaos effects your spell power. While you have Chaos Points, your Prime Modifier is equal to your Chaos Points.

Wrong Spell

Whenever a Chaotic creature fails a Spell Check, choose a random spell that they know, and use the relevant Failure or Miss option from that spell as if they had casted that spell instead.

Subclass Capstone Feature

Chaotic Luck

Outcomes are randomly changed in unexpected ways. Whenever a d20 is rolled by a Chaotic creature, its value is warped. If the result is odd, you add your Prime Modifier to it. If the result is even, you subtract your Prime Modifier from it.

Lag

Time starts moving at random speeds. At the start of its turn, a Chaotic creature must make a Physical or Mental Save of their choice:

Success: Nothing happens.

Success (each 5): They get +1 AP this turn.

Failure: Nothing happens.

Failure (each 5): They get -1 AP this turn.

Reality Forger

You seek to build a new environment that is to your liking.

Level 3 Subclass Features

Area Affinity

You gain affinity for AoE spells.

Increased size: Your Area Radius is multiplied by 2.

Modulation: You may spend 2 AP to target an existing AoE spell in your Bonded School within your Cast Range, and increase or decrease its radius (or diameter) by an amount up to your CM. If the radius gets reduced to 0, the spell ends.

Area Permanence

You learn how to make your spells stable long-term.

You gain the following Bond Affinity option:

- **Permanent:** 0 MP. Increase your Tether Range and/or Spell Duration up to infinity for this spell cast, if it has an AoE. This spell doesn't require Sustaining. Double the MP cost and casting time for this spell cast.

Permanent spells don't require Sustaining, even if the spell specifically states that it does. Permanent spells don't automatically end, even if the spell specifically states that it does.

You can't use the Permanent Bond Affinity option on a non-AoE spell.

Permanent spells cost double the MP to cast, and take twice as long to cast. If the cast time is less than 1 minute, the cast time is increased to 1 minute.

A Permanent spell is always centered on a point in space.

Permanent spells are resistant to being dispelled. If a creature attempts to dispel it, they must make a Spell Check with a DC equal to 10 plus its radius.

Success: They dispel the Permanent spell, provided the other conditions are met.

Failure: The Permanent spell still stands.

You may spend 4 AP to dispel a Permanent spell you cast, using the rules outlined above. You gain ADV on this check.

You may spend 1 AP and 1 MP to use your Area Affinity Modulation feature on a Permanent spell that you cast. You may not move a Permanent spell after casting it, even if the spell specifically states that you can.

Level 6 Subclass Features

Home Sweet Home

You can begin to call your area your home. Each of your Permanent spells contributes to the combined area called your Permanent Area. While in your Permanent Area:

- Whenever you roll for initiative, you regain all expended MP.
- Your Mana Spend Limit increases by your CM.
- You gain ADV on all Saves from spell effects.

Area Fixation

Whenever another creature attempts to cast an AoE spell in your Permanent Area, they have DisADV on the Spell Check, unless that spell is also Permanent or you give them permission.

Subclass Capstone Feature

Area Admin

You gain advanced control over who can access your areas.

You may spend 1 AP to choose a creature that is within your Cast Range and outside your Permanent Area to mark as Banned. At the start of a Banned creature's turn, if it's inside your Permanent Area, that creature takes true damage up to your CM and must make a Physical save:

Failure: the creature is forced 1 Space toward the closest square not in your Permanent Area.

This effect also happens the first time the creature enters your Permanent Area on its turn. If a Banned creature finds itself inside your Permanent Area due to you casting a spell on its location, its Banned mark is removed.

You may spend 1 AP to choose a creature that is within your Cast Range and inside your Permanent Area to mark as Penned. At the start of a Penned creature's turn, if it's not inside your Permanent Area, that creature takes true damage up to your CM and must make a Physical save:

Failure: the creature is forced 1 Space toward the closest square in your Permanent Area.

This effect also happens the first time the creature exits your Permanent Area on its turn. If a Penned creature finds itself outside your Permanent Area due to one of your spells being dispelled, its Penned mark is removed.

You may spend 1 AP to remove a Banned or Penned mark from a creature.

Each mark is permanent, and you may mark an infinite number of creatures. If you attempt to mark a creature you already marked, the new mark replaces the old mark.

If a creature would take damage from this feature, you may instead reduce that damage to any amount, minimum 0. You may also choose the maximum damage a creature can take from this feature when you mark them, up to your CM.

Reality Fixer

You fix reality to the way you believe it is originally meant to be. You believe reality is broken, and certain schools of magic are to blame.

Level 3 Subclass Features

Disdain Hinder

Choose a School of Magic, this becomes your Disdained School. Your Disdained School may not overlap with your Bonded School. You may choose an additional Disdained School whenever you choose an additional Bonded School, but you may not choose the same Disdained School more than once.

You can disrupt others who are casting spells in your Disdained School. You may choose 2 Disdain Hinder options from the list below. You learn a new Disdain Hinder option whenever you learn a bond affinity option.

- **Costly:** Double the amount of MP spent to cast this spell. If the caster can't pay the cost, the spell fails, still spending any MP they already spent.
- **Close:** Half this spell's cast range.
- **Tethered:** Add a Tether Range to this spell cast equal to its caster's move speed, or if it already has a Tether Range, half it.
- **Short:** Half this spell's duration, if its duration is longer than 1 round. If the duration is 1 round, the spell ends at the end of the turn instead.
- **Unfocused:** Half the spellcaster's Prime Modifier for this spell cast.
- **Weak:** Decrease all healing, damage, and temporary hp this spell grants by 1.
- **Thought Consuming:** This spell cast requires Sustaining, if it doesn't already.
- **Bumped:** This spell cast costs 1 AP extra. If the caster can't pay the additional AP cost, the spell fails, still spending any MP already spent.
- **Slow:** This spell cast takes twice as long to cast, if the cast time is 1 minute or more.
- **Small:** Half this spell cast's radius and/or diameter, if it is an AoE spell.
- **Exclusive:** Reduce the number of targets this spell can target by 1, minimum 0, if this spell can target creatures and/or objects.

You gain the following reaction:

Magic Disdain

Trigger: A creature within your Cast Range casts a spell in your Disdained School.

Reaction: You apply a Disdain Hinder option to it.

Either the caster or the spell must be within your Cast Range for you to use this feature.

Level 6 Subclass Features

Peace of Mind

You enjoy the feeling of not being around harmful magic. While there is no magical effect of any spell from your Disdained Schools within your Tether Range, you may spend 1 AP to regain MP up to your CM.

Advanced Spell Unraveling

You learn how to fix broken reality and prevent it from breaking.

Dispel: You may spend 1 AP to dispel any ongoing spell effect from your Disdained School within your Cast Range.

Counter: When you declare a Spell Duel against a spell in your Disdained School, you gain ADV on your Spell Check, and your challenging spell costs 1 AP less and 1 MP less, minimum 0.

Disdain Absorption

Requires Disdain Hinder

Whenever you apply a Disdain Hinder option to a Disdained spell, successfully Dispel a Disdained spell, or successfully counter a Disdained spell, you gain MP equal to that spell's combined AP and MP cost.

Subclass Capstone Feature

Perfection

You can stop imperfections from forming. You may spend 2 AP and 2 MP to create an anti-spell field at any point you can see. Like a normal spell, the anti-spell field is bound by your Cast Range, Tether Range, Spell Duration, and Area Radius; and requires Sustaining.

The anti-spell field causes any spell from your Disdained School that is cast in it or that overlaps with it to fail. Existing spells from your Disdained School that overlap with it are dispelled.

You may have any number of anti-spell fields active at a time. Your anti-spell fields Sustain themselves while you're inside at least 1 of them, even if you can't Sustain them yourself.

Reality Sharer

You want to help other people create their own realities.

Level 3 Subclass Features

Affinity Assist

You gain the ability to help others bend reality. You gain the following reaction:

Bend Spell

Trigger: Another creature casts a spell within your Cast Range from your Bonded Schools

Reaction: You add one of your Bond Affinity options to the spell not already applied to it.

You gain the following Bond Affinity option:

- Bent: 0 MP. Bind this spell to your Cast Range, Tether Range, Spell Duration, and Area Radius.

Spell Sharing

You can give someone else a piece of your power.

You can spend 1 minute to designate another willing creature you touch as a vessel of your power. The creature is a vessel for you. You can have any number of vessels active at the same time.

You can spend 1 AP to share a spell you know from your Bonded School with a vessel in your Cast Range. The vessel gains the ability to cast the shared spell, expending your MP, and selecting from your bond affinity options when they do so.

You can share a number of spells with the same vessel up to your CM. You can share the same spell with a number of vessels up to your CM. While sharing a spell with the max amount of vessels, you cannot cast that spell or share it.

A shared spell is still bound by your Cast Range, Tether Range, and Spell Duration, but the ranges use the vessel's position. A shared spell uses your Prime Modifier and is limited by your Mana Spend Limit. The vessel has to Sustain it, and can Sustain shared spells up to their CM, using your spell sustaining rules. Every reference to "you" or "self" in the shared spell refers to the vessel. If the vessel has a body part similar to your spellcasting focus body part, it glows your spell casting glow color when they cast a spell.

Being a vessel isn't forever. A creature automatically stops being a vessel if any of the following happens:

- The vessel duration for the vessel expires. A vessel's vessel duration is equal to your Spell Duration in days.
- The vessel becomes outside your Tether Range or shifts to another plane.
- The vessel dies or ceases to exist.
- The vessel willingly decides to stop being a vessel.
- You spend 1 AP to revoke their vessel status.

A vessel's vessel duration is automatically refreshed while it is within your Cast Range. Additionally, you may spend 1 AP to refresh the vessel duration of a vessel within your Tether Range.

You may spend 1 AP to take back any number of spells from a vessel within your Cast Range.

You may spend 1 AP to revoke a vessel's vessel status or dispel a shared spell Sustained by one of your vessels.

Level 6 Subclass Features

Vessel Network

You can see from your vessels' points of view. You may spend 1 AP to sense the world through one of your vessel's senses. This lasts until you end it as a free action.

Any position that is within Tether Range of a vessel is considered to be within Tether Range of you.

You may use your Reality Observer and Affinity Assist features on spells that a vessel sees. Additionally, you may use your Reality Studier feature on an ongoing spell that a vessel sees if you and that vessel both study it for 1 minute.

Worship

Your vessels can help you as much as you can help them.

Whenever a vessel finishes a long rest, they may pray to you, refreshing their vessel duration and granting you bonus MP equal to their level that lasts while they are conscious.

Subclass Capstone Feature

Evangelization

Your vessels can evangelize.

You may spend 1 hour to designate a willing vessel you touch as a prime vessel. That vessel then becomes a prime vessel.

A prime vessel has the ability to use your Spell Sharing feature to

- Designate other creatures as vessels of yours
- Share spells with other vessels. The spells they share must have already been shared with them.
- Refresh vessel duration of other vessels
- Revoke shared spells from other vessels
- Revoke vessel status from other vessels

You may spend 1 AP to telepathically communicate a message to a prime vessel. This doesn't enable the prime vessel to communicate back to you.

Being a prime vessel is forever, with a few exceptions. A prime vessel automatically stops being a vessel if any of the following happens:

- The prime vessel dies or ceases to exist.
- The prime vessel willingly decides to stop being a prime vessel.
- You spend 1 AP to make them no longer a prime vessel.

You may spend 1 AP to revoke a prime vessel's vessel state, making them either a regular vessel or just another creature.

Self-Shaper

You are a self-made person, literally. You modified your being and can modify it to your liking.

Level 3 Subclass Features

Shape Self

You can modify yourself daily. Whenever you finish a long rest, you may choose one option to make a permanent change to yourself:

- **Appearance.** You may change part of your appearance. Ex: the colors of your eyes, skin, hair/fur, racial markers, etc; your height, weight; facial hair, hair coverage, hairiness, facial shape; etc. This appearance change does not have any mechanical effect.
- **Vulnerability.** Gain vulnerability to a damage type by losing vulnerability to a damage type you already have.
- **Resistance.** Gain resistance to a damage type by losing resistance to a damage type you already have.
- **Immunity.** Gain immunity to a damage type by losing immunity to a damage type you already have.
- **Absorption.** Gain absorption to a damage type by losing absorption to a damage type you already have.
- **Skill.** Gain a skill point in a skill by losing a skill point in another skill.
- **Affinity.** Switch out a Bond Affinity option you know with another one you don't know.
- **Attribute (Level 2).** Increase an attribute by 1, by decreasing another attribute by 1.
- **Bonded Schools (Level 3).** Switch out one of your bonded schools for a different school that you don't know. You still remember spells from your old bonded school, but can't cast them.
- **Bending Trick (Level 5).** Switch out one of your Bending Trick spells for a new Bending Trick spell with the same Bending Trick level.
- **Ancestry (Level 6).** Change part of your ancestry. Gain an Ancestry Trait from any ancestry by losing an Ancestry Trait you already have. The new Ancestry Trait must be of equal or lesser value than the old Ancestry Trait. Optionally, you may choose 2 new Ancestry Traits, as long as their combined total is less than or equal to the old Ancestry Trait's cost. You may also choose which part

of your appearance changes. If you use this option multiple times, your appearance and ancestry can change completely.

- **Spell (Level 7).** Cast a spell you know from your Bonded School that targets only you. You gain the effects of the spell permanently and it doesn't require Sustaining. The spell must either have a duration longer than Instant and 1 round, or have a range of Self or Touch. The spell costs double the MP it normally would. If the spell fails, the MP are still spent, and so is the use of this feature. If the spell succeeds, you can't cast this spell normally or as part of this feature until you spend a future use of this feature to undo this effect.

What changes are available to you depends on your level.

Using this feature again doesn't automatically undo previous uses of this feature. However, you may spend a use of this feature to undo the effects of a previous use of this feature.

Self-Centered

You can always include yourself. Spells that you cast that target you cost 1 MP less to cast. Additionally, you gain the following Bond Affinity option:

- **Self-Inclusive:** 1 AP. Also target yourself with this spell cast if it targets one or more other creatures.

Level 6 Subclass Features

Improved Attribute Limit

Your Attribute Limit increases by your CM. Whenever you level up, you may increase an additional Attribute by 1.

Quick Self Cast

You can quickly protect yourself from any threat. You gain the following reaction:

Quick Self Cast

Trigger: Anything

Reaction: You cast a spell that targets only you.

Subclass Capstone Feature

Identity

You can modify yourself even more easily. Whenever you cast a spell that targets only yourself, it costs 2 MP less to cast, minimum 0, and your Mana Spend Limit is increased by your CM for this spell cast.

Additionally, when you cast a spell as part of your Shape Self feature, that spell costs 5 MP less to cast, minimum 0.

Luck Bender

Fortune favors you and bends to your will.

Level 3 Subclass Features

Luck Bend

Your spells are lucky. You gain the following Bond Affinity option:

- Lucky: 1 MP. Gain ADV X on this Spell Check, where X is your CM.

Lucky

Luck is on your side. Whenever a d20 is rolled within your Cast Range, you may spend 1 MP to force it to be rerolled, and then the most recent value must be used. Subsequent uses on the same roll cost an extra 1 MP, cumulative. You may use this feature on the same roll a number of times up to your CM.

Level 6 Subclass Features

Good Fortune

Natural luck comes to your aid. You regain 1 MP whenever:

- You or an ally rolls a 20 on a d20 or crits on an attack roll that hits
- An enemy creature rolls a 1 on a d20 or fumbles on an attack roll that misses

Plot Armor

No one can hurt you. Whenever you or another creature must make a Save, you may spend any number of MP to decrease the DC by 1 per MP spent.

Additionally, whenever you are attacked, you may spend any number of MP to increase your PD or AD by the number of MP spent, until the start of your next turn.

Subclass Capstone Feature

Luck Dictation

You have mastered fortune. You may spend 1 AP and 5 MP to determine the outcome of a situation. Until the end of your next turn, whenever a d20 is rolled, you may set its rolled value to any value possible for that die. You can use this feature once per long rest, but regain the ability to use it again when you roll for Initiative.

Item Infuser

You don't like casting spells directly, and instead prefer to infuse items with your power, and cast spells through them.

Level 3 Subclass Features

Infusing

You gain the ability to infuse an item with a spell.

You may spend 1 hour or more infusing an item you're holding with a spell from your Bonded School, applying Bond Affinity options as normal. The spell costs double the amount of MP it normally would. Make a Spell check with a DC equal to the spell's MP cost times 2, plus 20, minus the number of hours you spend infusing it. If you dangerously infuse a spell, add 10 to the DC.

Success: The item is infused with the spell.

Failure: The item is not infused with the spell, but the MP are still spent.

Infuse DC: $20 + (\text{MP cost} * 2) - \text{Infuse hours}$

Once complete, the item can be activated to cast the infused spell. The infused spell is still bound by your Cast Range, Tether Range, Spell Duration, and Area Radius at the time of infusion, but its Cast Range and Tether Range use the item's position instead of your position. When you infuse the item, you may instead choose to use a lower value for the Cast Range, Tether Range, Spell Duration and/or Area Radius. The infused spell always uses the Bond Affinity options applied to it when it was infused.

Anyone can use an infused item. The creature holding the infused item may spend 1 AP to consume a charge and activate the effect. If the item has no charges, nothing happens.

An infused item has a limited number of charges of a spell, regaining all charges at dawn each day. You can infuse a number of charges into an item up to your CM.

An item can only be infused with one spell at a time. If you infuse an infused item with another spell, the new spell overwrites the old spell.

Infused items are infused permanently and don't require Sustaining to remain infused. You may spend 1 hour to un-infuse a spell from an item you infused.

If the infused spell has range of Self, it targets the active user of the item. If the active user changes to another creature during the spell, the target switches to the new active user. If there is no active user, it targets no one, but does not end the spell early.

If the infused spell requires Sustaining, the item Sustains the spell itself. Activating a Sustained spell a second time ends the spell effect of the previous activations.

The holder of the infused item may spend 1 AP to dispel any spells cast by the infused item.

You learn the following Bond Affinity option:

- Infusable: 1 MP. Lower the DC to infuse this spell by your Mana Spend Limit times 2.

You can't use the Infusable Bond Affinity option on a spell that you're not infusing into an item.

You can quickly recharge an infused item. You may spend 1 AP and 1 MP to refill 1 charge into an infused item you're holding.

You can upgrade infused items you've previously infused. While holding the infused item, you can spend 1 hour and a number of MP equal to the infused spell's MP cost to upgrade or downgrade the infused spell's Cast Range, Tether Range, Spell Duration and/or Area Radius to be equal to or less than yours. You can also upgrade or downgrade its number of charges, up to your CM. You may also choose to change which Bond Affinity options the infused spell uses.

Level 6 Subclass Features

Remote Activation

You can remotely activate items you infuse. You may spend 1 AP to choose an item you infused that you know the exact location of. You then activate that item. If you can see or have senses of the infused item's surroundings, you can choose the targets. Otherwise, the infused item automatically targets the closest valid target or area. If the infused item is not in that exact location, this action fails.

Auto-Activation

You learn how to cause an item to react to a situation. You learn the following Bond Affinity option:

- **Reactive:** 2 MP. Set a reactive condition for this spell cast, which automatically activates this spell cast's infused item when met.

You can't use the Reactive Bond Affinity option on a spell that you're not infusing into an item.

Subclass Capstone Feature

Multi-Infusing

You learn how to cram more spells into a single item. You gain the following Bond Affinity option:

- **Appended:** 3 MP. Infuse this spell cast into an infused item without overwriting spells already infused into it.

When an item with multiple infused spells is activated, each spell is activated all in the same turn, in order of infusion, using the same targets, if applicable.

You can't use the Appended Bond Affinity option on a spell that you're not infusing into an item.

Battle Bender

You were made for war, and can bend the tides of battle to your will.

Level 3 Subclass Features

Weapon Observer

You remember every weapon, piece of armor, shield, and piece of equipment you see, as well as their stats.

Spell Conjunction

You can conjure spells into a piece of equipment. You gain the following Bond Affinity option:

- **Formed:** 1 MP. Conjure this spell cast into a piece of equipment you remember and equip it, if the spell can target one or more creatures.

The Formed spell appears as a spectral shape modeled after the piece of equipment you remembered, but has no special effects, and does not cast the spell's effects when conjured.

The Formed spell has max hp, PD, and MD equal to 10 plus its MP cost.

A Formed spell requires Sustaining like normal. It can't be Sustained while it has 0 hp or less or is not being held by a creature. You can have multiple Formed spells in existence at once.

Born to Forge

Conjuring weapons made of magic comes more naturally to you than casting spells.

Spells you cast without a Formed bond affinity option cost an extra 2 MP to cast.

When you cast a Formed spell, you may choose to spend 1 minute casting it instead, if it normally takes 1 AP to cast. If you do, the Formed spell's MP cost is reduced by your CM.

Weapon Conjunction

You can conjure spells into a weapon. You gain the following Bond Affinity option:

- **Weapon-Formed:** 1 MP. Conjure this spell cast into a weapon you remember and equip it, if the spell can target one or more creatures.

A Weapon-Formed spell counts as a Formed spell and follows the same rules as outlined in your Spell Conjunction feature, but with the special abilities outlined below.

When you conjure a Weapon-Formed spell, it comes formed as the chosen weapon that you remembered, with the same damage and properties, but with true damage as the damage type. When it hits, it procs your Formed Spell Proc feature on the target. If it is ranged, it magically conjures its own ammo, and its close range and max range is your Cast Range and Tether Range, respectively. If it is thrown, its close range and max range is your Cast Range and Tether Range, respectively.

You have mastery with your Weapon-Formed spells, and you learn all Attack Maneuvers. Other creatures may also have mastery with them, if it is in the form of a weapon that they have mastery with.

Formed Spell Proc

Your Formed spells can cast themselves on a target. When a Formed spell procs this feature on a creature, it casts the Formed spell on them. Any Spell Checks in the spell's description automatically succeed, and the creature automatically fails any Agility saving throws in the spell's description. The spell may only target the single creature, even if the spell description says otherwise. If the spell effect is bound by your Spell Duration, you have to Sustain it separately from the Formed spell that created it.

Armor Conjunction

You learn to protect yourself with your spells. You learn the following Bond Affinity option:

- **Armor-Formed:** 2 MP. Conjure this spell cast into a piece of armor you remember and don it, if the spell can target one or more creatures, and has a duration longer than Instant and 1 round.

An Armor-Formed spell counts as a Formed spell and follows the same rules as outlined in your Spell Conjunction feature, but with the special abilities outlined below.

When you conjure an Armor-Formed spell, it comes formed as the chosen piece of armor that you remembered, with the same PD and AD bonus, but no movement or ability penalty. You can choose to conjure it on a willing creature you touch instead of yourself.

Whenever you don an Armor-Formed spell, it procs your Formed Spell Proc feature on you. The spell lasts while the armor is donned, and ends automatically when the armor is doffed or it dissipates.

You can only wear one Armor-Formed spell at a time. If you don an Armor-Formed spell while already wearing one, the new one replaces the old one, and the old one dissipates. You may wear an Armor-Formed spell over physical armor.

You have training with your Armor-Formed spells. Other creatures may also have training with them, if it is in the form of a piece of armor that they have training with.

You can force armor onto unwilling creatures. You may attempt to use your Armor Conjunction feature on an unwilling creature, spending MP as normal. Make a Spell check against the creature's Charisma Save.

Success: You conjure the armor on the unwilling creature.

Failure: You fail to conjure the armor, but you still spend the MP.

Shield Conjunction

You learn how to conjure shields. You gain the following Bond Affinity option:

- Shield-Formed: 2 MP. Conjure this spell cast into a shield you remember and equip it, if the spell can target one or more creatures.

A Shield-Formed spell counts as a Formed spell and follows the same rules as outlined in your Spell Conjunction feature, but with the special abilities outlined below.

When you conjure a Shield-Formed spell, it comes formed as the chosen shield that you remembered, with the same PD and AD bonus.

A creature holding one of your Shield-Formed spells gains the following reaction:

Spell Shield Intercept

Trigger: You or an ally within melee range of you is targeted by an attack

Reaction: You intercept, imposing DisADV to the attack roll. If the attack misses, your Shield-Formed spell procs your Formed Spell Proc feature on the attacking creature, if that creature is within your Cast Range.

You have training with your Shield-Formed spells. Other creatures may also have training with them, if it is in the form of a shield that they have training with.

Level 6 Subclass Features

Arcane Armor

You can protect yourself with your magic reserves. You may spend 2 AP to gain temporary HP equal to your current MP.

Extra Attack

Your combat prowess grows. Your second attack each turn ignores the Multiple Check Penalty.

Subclass Capstone Feature

Violent Dismissal

You figure out how to exploit the volatile nature of your Formed spells. You may spend 1 AP to choose one of your Formed spells and make it explode. All creatures in a radius equal to your Cast Range and with line of sight of the Formed spell must make an Agility Save.

Success: The target takes true damage equal to your CM.

Failure: The target takes true damage equal to your CM and the Formed spell procs your Formed Spell Proc feature on them.

The Formed spell is destroyed immediately when it explodes.

Additionally, you gain the following reaction:

Last Word

Trigger: One or more of your Formed spells is about to end, or you or another creature you can see dies

Reaction: You may activate your Violent Dismissal feature on any number of your Formed spells about to dissipate.

Far Watcher

You don't really want to participate in reality, and prefer to watch it unfold instead.

Level 3 Subclass Features

Bystander

You learn how to keep other people from interacting with you. You may spend 1 AP and 1 MP to make yourself invisible. This effect is bound by your Spell Duration and Tether Range, and requires Sustaining like a normal spell.

This effect ends automatically if you attack or cast a spell.

Unseen Casting

You learn how to keep your spells from giving you away. You gain the following Bond Affinity option:

- Invisible: 1 MP. Make this spell cast and its effects invisible. Casting this spell doesn't end invisibility effects.

An Invisible spell can't be seen by anyone but you. An Invisible spell will not give away your location or inform other creatures that it was you who cast it, nor will it end the Bystander effect. An Invisible spell that mentions you in the description instead mentions nobody.

Safe

You learn how to make yourself less vulnerable. You may spend 1 AP and 1 MP to make yourself ethereal. While you are ethereal:

- You can pass through walls, creatures, objects, and other tangible materials.
- You are untargetable and immune to all damage types.
- Your attacks don't deal damage.
- Your spells don't deal damage, don't heal, don't grant temporary hp, can't kill a creature, and can't revive a creature.

This effect is bound by your Spell Duration and Tether Range, and requires Sustaining like a normal spell.

Level 6 Subclass Features

Watch Together

You can bring guests into your world. You can use your Far Watcher Bending Style features on a creature within your Cast Range instead of yourself, including:

- Bystander
- Safe
- Predictive
- Removed from Reality

The creature must be willing. If they are not, you can attempt to force the effect on them. If you do, make a Spell check against their Charisma Save. Success: the creature is effected.

Because these effects are also bound by your Tether Range, if a creature under one of these effects leaves your Tether Range, these effects end for that creature.

Creatures that you used your Bystander effect on can see each other, and creatures that you used your Safe effect on can interact with each other as normal.

Predictive

You get good at predicting outcomes. Whenever you cast a spell, you can spend 2 MP to simulate it instead. This extra MP cost doesn't count against your Mana Spell Limit. Process the spell like normal. If you like the outcome of the spell, you can commit it to reality and the game continues as normal. If you don't like the outcome of the spell, you can revert all changes the spell made, and the game continues as if you had not cast that spell.

Subclass Capstone Feature

Removed from Reality

You learn how to change the channel. You may spend 1 AP and 5 MP to shift to another plane of existence. You may bring any number of creatures you used your Watch Together feature on with you.

Dreamer

Your dreams have a strange way of effecting reality. When you go to sleep, you cast spells and do things you'd do in a dream. But the things that happened in your dreams happened for real.

Level 3 Subclass Features

Sleep Walking

Your mind wanders the plane, conjuring a version of you. Whenever you fall asleep, your dream self appears as an illusion of you within Cast Range of the last person, place, or thing you thought of when going to sleep.

You can see, hear, and sense from your dream self, and you have full control over your dream self. Your dream self is tangible and can interact with objects. You can cast spells from your dream self, using your dream self's position for the Cast Range and Tether Range.

Your dream self has all your stats and takes damage as normal. If your dream self dies or drops to 0 hp, it disappears and you wake up. Then you can't go back to sleep for at least 10 minutes.

You have multiple different dreams at night, as dreams come and go. Dreams always start at a dream target. Dreams can end in multiple different ways:

- If your dream self becomes further than your Tether Range from your dream target
- When your dream self is near your dream target for longer than your Spell Duration
- Your dream self falls to 0 hp
- You spend 1 AP to end the current dream

When your current dream ends, your dream self disappears and you are no longer dreaming.

When a dream ends, you must make a DC15 Mental check:

Success: You remember everything that happened in the dream.

Failure: you forget everything that happened in the dream, but can remember one detail about a place you went to, a person you met, or a creature and/or object you saw.

While you're sleeping but not dreaming,

- You see only blackness
- You don't perceive time
- You may begin a new dream at any time, provided you have dreams left

You can have a number of dreams per long rest equal to your CM. When you begin a new dream, you may choose a new dream target. You must choose a different dream target for each dream in a long rest.

When a dream begins, you regain all MP. When a dream ends, you lose all MP.

While you are awake, you have no MP.

Spells that would normally automatically disappear when you fall asleep instead disappear at the end of a dream.

Dream Variance

Your dreams can take on a mind of their own. You have a new stat called your Dream Value, which starts at 0 at the start of a dream. Your Dream Value is added to your Prime Modifier for Checks and Saves that your dream self makes. Your spells have their MP costs reduced by your Dream Value, minimum 0.

When your dream self takes damage, reduce your Dream Value by the damage taken.

You gain the following Bond Affinity option:

- Dream Bend: 1 MP. This spell cast refreshes the duration of your current dream and increases your Dream Value by 2.

Level 6 Subclass Features

Stasis

Your dreams protect you. Whenever you go to sleep, and at the start of each of your turns while sleeping, you gain temporary hp equal to your Dream Value, minimum 0. When you wake up, you lose these temporary hit points.

While you have temporary hit points, taking damage doesn't wake you up.

Dream Logic

Your dream self can teleport. You may spend 1 AP to teleport your dream self to a space within Cast Range of your dream target.

Whenever your dream self would fall or otherwise be forced to move, you may make a DC10 Spell check instead.

Success: Your dream self doesn't fall or get moved forcefully, becoming ethereal if necessary to avoid sharing a space with another creature or object. It becomes solid again when it is no longer sharing a space with that creature or object.

Failure: Your dream self falls or gets moved forcefully like normal.

Additionally, you're unbound from your physical form. When you enter a new dream, your dream self can appear as any creature you've seen before. It still has your stats and abilities. It gains 2 Ancestry Points with which to spend on Ancestry

Traits and/or Beast Traits. It keeps these new Ancestry Traits until the end of the dream.

Subclass Capstone Feature

Just a Dream

You can fight nightmares. You gain the following reaction:

End Nightmare

Trigger: Anything

Reaction: You end the current dream.

When you end a dream, you can undo one negative event that happened in that dream:

- The death of a player, NPC, or pet. They come back to life with an amount of hp equal to your Dream Value, minimum 1.
- The destruction of an item.
- The casting of a specific spell that was cast within the last round.
- An action that another creature took within the last round.

Elemental Master

You have an affinity for one element in particular, and you can weave it into your spells and your spellcasting style.

Level 3 Subclass Features

Elemental Attunement

You attune to a particular element. Choose a damage type: fire, cold, lightning, sonic, poison, corrosion, psychic, radiant, or umbral. This becomes your attuned element.

Your weapon attacks within your Cast Range deal an additional 1 damage of the type of your attuned element.

You gain the following bond affinity option:

- Elemental: 0 MP. This spell deals damage of the type of your attuned element instead of its original type, if it deals damage.

Elemental Recharge

You can thrive off your element.

When you deal damage of your attuned element to another creature, you regain 1 MP.

Element Style

You gain various bonuses, depending on your attuned element:

- Cold: Whenever you deal damage to a creature, they must make a Physical Save. Failure: They become Impaired and Hindered.
- Fire: When you deal damage, double the damage.
- Lightning: Single target spells can be cast without the Multiple Check Penalty.
- Sonic: Every action you take is incredibly loud. Creatures within your Cast Range gain ADV on Stealth rolls, and you gain ADV on Perception checks.
- Poison: Damaging a creature imposes DisADV to their next Check or Save.
- Corrosion: Damaging a creature lowers their PD and AD by 1. This effect can stack.
- Radiant: Spells you cast and targets you effect shed light in a 1 Space radius. Creatures have ADV when attacking a target you're lighting up.
- Umbral: When you deal Umbral damage to a creature, it becomes marked. A marked creature takes an extra 1 Umbral damage whenever they take damage of another type. This effect can stack.
- Psychic: When you damage a creature, it must choose one feature or spell that it has. It can't use that chosen feature or spell.

These effects are bound by your Spell Duration and Tether Range.

Elemental Armor

You learn to protect yourself from your own element. You gain Resistance (X) to your element, where X is your CM. Additionally, you gain the following reaction:

****Elemental Armor**

****Trigger:** You would take damage of your elemental type.

Reaction: You spend 2 MP to grant yourself Immunity to it, or you spend 5 MP to grant yourself Absorption to it.

Elemental Piercing

You learn to overcome defenses to your element. You learn the following Bond Affinity options:

- Pierce Elemental Normal: (1 MP) Your elemental damage of this spell deals damage to the target as if the target had Vulnerability (X), where X is your CM, if the target usually receives normal damage from your element.
- Pierce Elemental Resistance: (2 MP) Your elemental damage of this spell deals damage to the target as if the target didn't have Resistance, if the target has Resistance to your element.
- Pierce Elemental Vulnerability: (3 MP) Your elemental damage of this spell deals damage to the target as if the target had Resistance (Half), if the target has Immunity to your element.

Level 6 Subclass Features

Elemental Trick

Spells that deal damage of your attuned element cost 1 MP less to cast. Bending Tricks that deal damage of your attuned element are considered an Elemental Bending Trick. Elemental Bending Tricks cost an additional 1 MP less to cast.

Combo Moves

You become experienced in how to combine your spells. You gain the following reaction:

Elemental Flow

Trigger: One of your Elemental Bending Tricks ends

Reaction: You cast another Elemental Bending Trick, using the position of the last one as the point of reference for the Cast Range of the new one.

Both may use the same base spell. The second Elemental Bending Trick's MP cost is reduced by the first Elemental Bending Trick's MP cost, minimum 0.

Subclass Capstone Feature

Elemental Mastery

You master your element.

Bending: Your Mana Spend Limit for casting Elemental Bending Tricks increases by your CM.

Trance State: You may spend 4 AP to gain Absorption to your element for a number of rounds equal to your CM. During this time, you gain an equal amount of MP whenever you gain HP. You may use this once per long rest, but may use it again when you roll initiative.

Meditation: You may spend 10 minutes meditating with your element to regain all MP.

Card Bender

Your magic spells manifest as a deck of cards.

Level 3 Subclass Features

Spell Roulette

Your magic manifests itself as a deck of cards.

The Deck: You may spend 4 AP and 2 MP to manifest your deck of spells, which contains 1 copy of each spell you know from your Bonded School. At the start of your turn, you must spend 1 AP to Sustain the deck. You can only Sustain 1 deck at a time.

The Draw: You may spend 1 AP to draw a card from the top of your spell deck and look at it. The spell is instantly cast on you, regardless of its casting time and without paying its cost. This is called a Drawn spell. If you're willing, other creatures can also use this feature to draw a card, else they must try to steal a card to draw one.

The Card: A Drawn spell only targets the card holder (or the card holder's space). If the card holder is an invalid target for the spell, then the spell has no effect (e.g. a living creature draws Distort Value). The Drawn spell automatically succeeds any Spell checks at the lowest success level, and the card holder automatically fails any Agility saves at the highest failure level.

The Surprise: You gain the following reaction:

Warp Card Effect

Trigger: A Drawn spell from your deck is activated.

Reaction: You apply bond affinity options to the Drawn spell.

Additionally, you gain the following Bond Affinity options:

- **Blue Card:** 2 MP. This spell deals 3 true damage instead of its usual effect.
- **Red Card:** 2 MP. This spell deals 1 true damage to the target and all creatures within 1 Space of it instead of the spell's usual effect.
- **Gold Card:** 2 MP. This spell stuns the target for 1 round, if the target fails any Saves for this spell.

The Hit: You may draw for another creature. You may spend 1 AP to draw a card without looking at it and use it on another creature in the following ways. Once it gets used like this, the card disappears.

Melee: Make a melee weapon attack. **Hit:** The card targets the creature as if they had drawn the card themselves.

Ranged: Make a ranged weapon attack ([Cast Range] / [Tether Range]). **Hit:** The card targets the creature as if they had drawn the card themselves.

Trap: Place the card facedown on a table, counter, chair, or other surface. The first creature to hold the card and look at its front activates it, and the card targets the creature as if they had drawn the card themselves.

Card Counter (Flavor Feature)

You can imbue regular playing cards with your magic. You gain ADV on Insight Checks made to identify a regular face down card and ADV on Trickery Checks when handling cards.

Level 6 Subclass Features

Reverse Card

When you declare a Spell Duel, you may spend 1 AP and 1 card to challenge the initiating spell. If you win the Spell Duel, the challenging card absorbs the initiating spell and sends it back to its caster. Make a Spell Check against the initiator's PD.

Hit: The card casts the initiating spell on the initiator.

Subclass Capstone Feature

Heart of the Cards

You become attuned to your deck's ways. Whenever you draw a card and don't look at the face of it, you may make a number of guesses about the spell up to your CM. For each piece of information you get right about the spell, the total MP cost of Bond Affinity options applied to it is reduced by 1, minimum 0. If you guess the name and get it exactly right, you get the maximum MP cost reduction and regain 2 MP.

For example, if you guess that the first letter of the spell is "T", that its AP cost is 1, and that its duration is 10 minutes; and the spell you draw is revealed to be Tidal Wave, you would have correctly guessed 2 pieces of information about it, and the spell would be have its MP cost reduced by 2.

Death Bender

You use the dead to bend reality to your will.

Level 3 Subclass Features

Raise the Dead

Exhume: You can exhume dead bodies from their resting place. You may spend 1 AP and 1 MP or more to animate a number of dead bodies within your Cast Range equal to the MP spent. Dead bodies animated in this way become undead minions, and if they are able, they will spend all their actions on movement to get to your location, digging through as much dirt and opening as many doors as they need to.

Undead Minions: Undead minions:

- Do not require Sustaining
- Start with health equal to your CM
- Can't be healed by magical or mundane means
- Have psychic immunity

Servitude: You may spend 1 AP to telepathically command a number of undead minions up to your CM, and they will do as you say. Common commands include Attack, Move, Carry, and Die.

Undead Magic: You gain the following bond affinity options:

- Horde Immunity: 1 MP. This spell has no effect on your undead minions.
- All Undead: 1 MP. This spell targets all your undead minions within your Cast Range.

Level 6 Subclass Features

Undead Fortitude

You can syphon the energy of your undead minions. You may spend 1 AP and 1 MP to consume the energy of one of your undead minions within your Cast Range. You gain health equal to that undead minion's remaining health, and the undead minion dies, unable to be reanimated again.

Additionally, you gain the following reaction:

Undead Fortitude

Trigger: You drop to 0hp or less

Reaction: You disintegrate one of your undead minions, healing for its remaining health. Then, if you have less than 1 health, you heal to 1 health.

Subclass Capstone Feature

Mass Exhume

You can turn the tide of battles with a sudden rise of undead.

You may spend 4 AP and 5 MP to target any amount of creatures that you can see within your Cast Range and that have died within your Spell Duration. You may then use your Raise the Dead feature on all of them at once. They have health equal to your CM times 5.

Creature Wrangler

You channel your magic into creatures you can train.

Level 3 Subclass Features

Conjure Them All

You can conjure a creature in the shape of a creature you remember with your Magidex feature. You gain the following bond affinity option:

- **Conjured Creature:** 1 MP. Conjure this spell as a creature in a space you can see within range instead of casting it.

A Conjured Creature spawns with HP equal to the total amount of AP and MP spent to cast it. While a Conjured Creature spell is alive, you cannot cast that spell. When a Conjured Creature spell dies from having its HP reduced to 0, it disappears, and you cannot cast that spell again until you finish a long rest.

Creature Party: You can have a number of Conjured Creatures at a time up to your CM. When you cast another Conjured Creature spell while you already have the maximum allowed out, one Conjured Creature of your choice automatically dissipates. Each Conjured Creature has its own turn in the turn order.

Aggro Threat

You get your Conjured Creature to fight for you.

Whenever a Conjured Creature makes an attack on a creature, that creature has DisADV on any attack roll not made against a Conjured Creature that attacked it, and the Conjured Creature has ADV on any attack of opportunity attacks it makes on the target creature until its next turn.

Magidex (Flavor Feature)

You have an encyclopedic knowledge of creatures you see, and recall them and their stats. You gain ADV on Knowledge checks to recall information about creatures you've seen.

Level 6 Subclass Features

Creature Cast

You can cast spells through your Conjured Creatures. You gain the following Bond Affinity option:

- **Creature Cast:** 1 MP. Cast this spell from one of your Conjured Creatures. If this spell is the same spell as the Conjured Creature's spell, reduce its MP cost by 2.

Medical Assistance

You can intervene in the fight. You gain the following reaction:

Emergency Assistance

Trigger: Anything

Reaction: You spend any amount of MP to heal a Conjured Creature for an amount of HP equal to your CM times the MP spent.

Leveling Up

Your Conjured Creatures can level up. After killing an enemy or after a battle, at your DM's discretion, one or more of your Conjured Creatures can level up. When they do, give it a Bending Trick upgrade.

Mount

Some of your Conjured Creatures may be big enough to ride. To be rideable, a Conjured Creature must also be a Bending Trick. It must also resemble a species that is big enough to ride, such as a horse or whale. If it is not, you may spend 1 AP and 2 MP to increase its size by 1. It then counts as a mount for you.

You may spend 1 AP to mount and/or dismount your mount.

While on your mount, your mount moves on your turn, and may take its turn during yours.

Subclass Capstone Feature

Use Ability!

Your Conjured Creatures can use the spells they were made with. On its turn, a Conjured Creature can spend 1 HP to cast its spell, using its position for the spell's Cast Range and Tether Range. It casts with all the bond affinity options applied to it when it was conjured.

Reality Scholar

You study reality and hone your skills in manipulating magic.

Level 3 Subclass Features

Raw Power

You have more raw power than other Reality Benders.

Mana Wellspring: Whenever you level up, you gain an additional +2 MP.

Affinity Fluent: You learn 2 additional Bond Affinity options.

Trick Taking: Whenever you level up, you may increase the Bending Trick level of 1 additional spell.

Studious (Flavor Feature)

You understand the ins and outs of magic. You gain ADV on Arcana and Insight checks made to identify magical effects. You gain ADV on your checks to learn spells from magical effects you've identified.

Level 6 Subclass Features

Mana Overflow

Your Mana Spend Limit is increased by your CM. Additionally, whenever you regain MP from a feature, it can go over your MP maximum.

Mind Palace

You can will your power back to you.

In combat, you can spend 2 AP to focus and regain MP equal to your CM.

Outside of combat, you can focus for longer. Focusing for 10 minutes without interruption restores MP equal to your max MP. Once you use this feature outside of combat, you can't use it outside of combat again until you finish a long rest or roll for initiative.

Subclass Capstone Feature

Spell Write

You can make your own spells.

You can spend 8 hours of continuous tinkering and study to modify an existing spell's text for yourself or create an entirely new spell.

Discuss with your DM how the spell should work, how it should be worded, and what its AP and MP costs are. Make sure your DM approves of it before using it.

The new spell and/or modified spell must be from one of your bonded schools.

Reality Performer

You sing and dance to cast your spells. Basically, a bard-like subclass.

Level 3 Subclass Features

Performance

You can cast your spells with a performance. Choose a performance style that you can do with your spellcasting focus body part.

Performance: You may spend 4 AP and 2 MP to start a performance on your turn, and then you must spend 1 AP and 1 MP on your following turns to Sustain the performance. This is independent of and in addition to Sustaining any regular spells that you cast. You target each creature in your performance's area of effect, if that creature can see/ hear you and is not immune to being charmed.

Performance Area: Your performance has a radius up to your Area Radius, and its shape is a circle centered on you. This is your performance area. Your performance has a max duration equal to your Spell Duration, minimum 1 minute. Whenever you start or Sustain a performance, you may change the radius of your performance area, up to your Area Radius, and decide whether or not your performance area includes you.

Performant Spells: You learn the following Bond Affinity option:

- **Performance:** 1 MP. This spell is bound by your performance, if it has an area of effect or can target one or more creatures.

Crowd Energy: Whenever a creature is effected by one of your Performance spells, you regain 1 MP.

Big Show: You can weave your performance into another one. Whenever you stop Sustaining a Performance spell, you may spend 2 AP to cast a new Performance spell within the same performance, without paying the MP cost of the new spell. The MP cost of the new spell must be equal to or less than the MP cost of the old spell plus your CM.

Level 6 Subclass Features

The Show Must Go On

You can endure through encounters despite hecklers. You have Dazed Resistance while Sustaining a performance. Additionally, you gain the following reaction:

Show Stopper

Trigger: Anything

Reaction: You use your Performance Big Show feature.

Subclass Capstone Feature

Double Feature

You become multitalented. You can now:

- Sustain 2 Performance spells with the same performance
- Your second Performance spell each turn ignores the Multiple Check Penalty

Safe Guarder

You care about those in your reality and do what you can to keep them from harm.

Level 3 Subclass Features

Gloves On

You can keep yourself from harming others. You learn the following Bond Affinity option:

- Safe: 0 MP. This spell deals 0 damage, if it would deal damage. It also costs 2 MP less, minimum 0. You may double your Prime Modifier for this spell cast.

Safe Feeling (Flavor Feature)

You gain ADV on Influence checks to make creatures trust you, provided you are not hostile to them.

Level 6 Subclass Features

Damage Mitigation

You can keep others from doing harm. You gain the following reaction:

Mitigate Damage

Trigger: Another creature casts a spell within your Cast Range

Reaction: You choose one of the following that you have not chosen since the end of your last turn:

- Reduce that spell's damage to 0
- Change all damage in that spell to giving temporary hp instead
- Change all damage in that spell to healing instead
- Cast a Safe spell

Additionally, you gain +2 AP extra at the end of your turn. This extra AP goes away at the start of your next turn.

Subclass Capstone Feature

Spell Snare

You can take away toys from those who don't play nicely with them. Whenever you use your Damage Mitigation feature on a spell, and that spell deals no damage, that spell's caster cannot cast that spell again until they finish a long rest.

Hunter

You hunt your targets by bending reality around them, leaving them no choice but to walk into your grasp.

Level 3 Subclass Features

Mark

You can mark a creature as your quarry. Take a hair, piece of clothing, or other possession that belongs to your quarry. After 1 minute of focus, you mark that creature as your quarry. You may cast spells on your quarry, or centered on your quarry, if they are within your Tether Range, and you do not need to see them to cast spells on them. You have ADV on initiative checks in combats with your quarry.

You learn the following Bond Affinity option:

- Seeking: 1 MP. This spell only targets your quarry, and if it has an area of effect, it only effects your quarry. Additionally, its cast range is increased by your Cast Range.

Seeking spells don't give away your position, break invisibility, or give any indication that you are the one casting the spell.

Sense

You can sense your quarry. You may spend 1 AP to make a Spell check against your quarry's Agility save. Success: you know your quarry's exact location. Failure: you only sense in which direction they are.

Level 6 Subclass Features

Hunt

You can easily kill your quarry. Whenever you deal damage to your quarry, it drops to 0 hp instantly if it has remaining health equal to or less than your execute threshold. Your execute threshold is equal to your CM.

Dead or Alive

You can control the lethality of your spells. You learn the following Bond Affinity options:

- Dead: 2 MP. Creatures effected by this spell are also effected by your execute threshold.
- Alive: 2 MP. Creatures dropped to 0 hp or less by this spell are instantly stabilized but not woken up.

Subclass Capstone Feature

Hunting Party

You can get help catching your quarry. When you use your Mark feature, you may include other creatures in the 1 minute of focus. When you do, they gain the benefits of that feature on your quarry.

Creatures must be within 2 Spaces of the focus to benefit from it. Creatures you used this feature on are bound by your Spell Duration and Tether Range, and lose the benefits of this feature if those requirements aren't met.
